

Application Specific Full Use

An Application Specific Full Use license is a restricted type of license sold with an Application Package. Application Specific Full Use licenses may only be used by the end-user to execute the Partner's application program, as defined in an Application Package Attachment and may not be used with more than one Application Package or with third-party applications. Application Specific Full Use Programs may be used in conjunction with an Application Package that has been modified or customized provided the customizations and modifications remain within the scope of the Application Package.
